

Mark Burleigh

I work as the Assistive Technology Officer in the Cork Institute of Technology.

From my perspective, there are two aspects that I would like to highlight in relation to updating the copyright law:

1. That all academic books (From primary to third level) be available in e-book format.
2. When the books are in e-book format, that they are compatible with assistive technologies e.g. Read write Gold text-to-speech software.
